**Warning Patterns tab**

Click the **Warning Patterns** tab to color-code warning patterns alerting you to invalid design patterns.

| **To display warning patterns as you design, check the Display option of the warning patterns available in this tab (see the descriptions and examples of the patterns below).** |
| **To change the color to a particular warning pattern, click the drop-down arrow under Color for each warning pattern you wish to display and click the desired color. If you want to use another color, click Other to display the Color dialog.** |

**Colliding Items Pattern** alerts you when items collide in your design.

Here is an example of colliding items.

![Colliding Items Pattern](image)

**Rules Advisory Pattern** alerts you when design conflicts are encountered according to the 20-20 Assistants. See [Use the design assistants](#) for further details.

Here is an example of items that do not conform to the design rules according to the 20-20 Assistants.
**Invalid Sections Pattern** alerts you when countertop or trim sections have invalid dimensions or are missing cuts.

Here is an example of a countertop section that is missing a cut in the upper left corner.

**Invalid Items Pattern** alerts you when items on your design are no longer available or need to be switched.

Here is an example of items that need to be switched since they are obsolete.
